

PREDICTING NYC TAXI FARE AMOUNT

By Omar Hijazi

PROJECT OVERVIEW

GOAL: Predict NYC taxi fare amount given details such as pickup/dropoff location, time, etc.

REQUIREMENTS:

- Competitive and profitable
- Automated
- Instantaneous

WHO CARES?

DATA

Source: NYC Taxi & Limousine Taxi Commission.

Year: 2017

Constraints / Assumptions:

- Trips lasting 2 minutes to 2 hours.
- Trips from 0.2 miles up to 60 miles.

RIDERS: WAKE EARLY... PAY LESS!

Best time to leave: 5-6 am

Wait 3 hours: \$1.50 to \$2.00

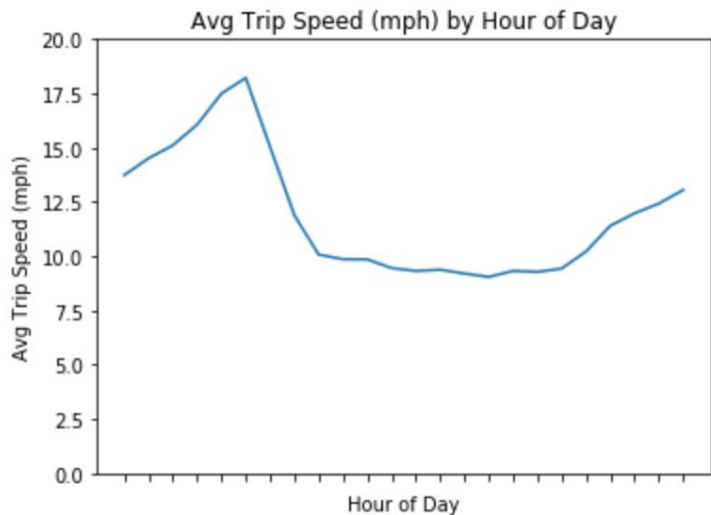

extra per mile!

RIDERS: WAKE EARLY... TRAVEL FASTER!

Best time to leave: 5-6 am.

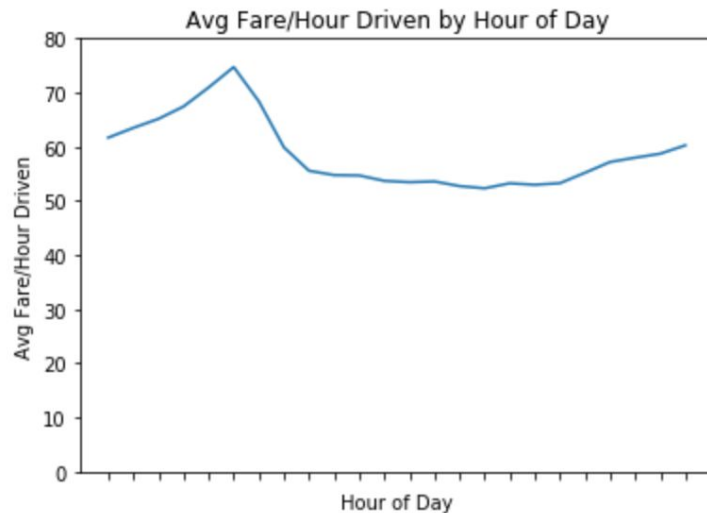

Wait 3 hours: 2x journey time.

DRIVERS: WAKE EARLY... MAKE MORE MONEY

Best time to leave: 5-6 am!

Wait 3 hours: Make 20-30% more.

DRIVERS: WAKE EARLY... CATCH THE RIDERS!

Hmmm... to catch those money-making riders, you better wake up early.

Demand at 8-9 am is ~4 times demand at 5-6 am.

STRONGEST PREDICTORS OF FARE

Time. Distance. Duration ---> Fare Amount

PREDICTION RESULTS

Median trip fare: ~\$9.00

Avg trip fare: ~\$10.50

Best Model Predictions: \$0.46 from actual fare

- +/- 5% from median fare
- +/- ~4.4% from avg fare
